HOW TO INSTALL

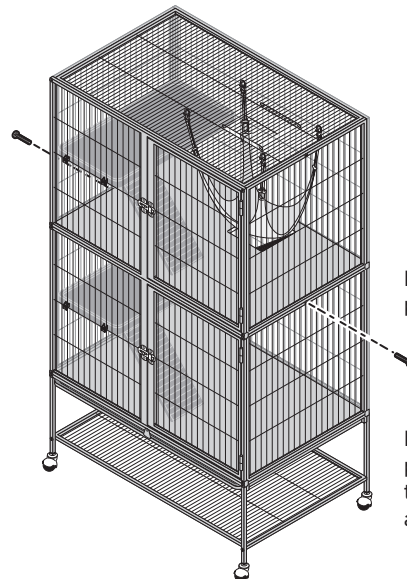

Use the solid cover for your bottom cage floor grille. Pull the fitted cover over the sides of the grille as you would fitted sheets over a mattress.

Different models of the #485 cage have the mid-level floor opening in one of two positions. Find the cover with the opening that matches up with your mid-floor grille and pull the cover onto the grille.

On both ends, where screws hold the floor in place, carefully use a pointed object (ie: pen, pencil, scissors) to poke a starter hole through the fabric.

Poke a starter hole through the fabric on both ends.

Place the covered mid-floor grille into place in the cage and replace the screws.

Place the covered bottom floor grille into place in the cage. Replace the ramp on the mid-level floor, if it was being used, and any other ramps or accessories.
