NEW FOR BIRDS 2023

new!

Quiet Me™

A TRAINING TOOL USING FLASHING LIGHT TO QUIET OUTBURSTS

When a bird's rambunctious side becomes an attention-seeking habit, or when they're exhibiting self-destructive behavior, how do you safely and humanely redirect their energy?

Quiet Me™ can break the trend and open a path to better behavior.

WHAT IS Quiet Me?

Quiet Me is a compact training tool which emits a safe, non-harmful light on a slow, relaxed pulse sequence (1 sec. ON / 2 sec. OFF / 4 times). The unit can be activated by tapping the button on the top or via the remote from a distance of up to 150 feet.

HOW DOES IT WORK?

The device emits a bright light that is safe to look at and yet strong enough to capture their attention. As the bird's curiosity at the light takes over, the tantrum diminishes, and the bird becomes calmed and quieted.

WHY DO I NEED IT?

It's difficult to retrain the bird's behavior during an outburst.

Quiet Me safely and effectively breaks the tantrum and allows for supporting the quieter behavior with attention, treats or rewards.

Over time, you will begin creating a healthier, more peaceful environment for you and your bird.

The PREVUE BIRD TOY System

Birds need a variety of toys to satisfy physical and sensory instincts.

To help your sales team (and customers) select a satisfying range of items for birds, Prevue has organized toys within four activity categories. As customers understand the benefits to their birds, they'll come back for more and make informed choices.

All activity categories are offered under two toy types — playfuls™ and naturals™.

TOY TYPES

PLAYFULS™

Colorful toys with a mix of bird-safe, non-toxic, natural and man-made materials, shapes, fibers, textures, papers, and more. All colorings are FD&C-approved.

NATURALS™

Wholesome toys made from materials grown in the earth—uncolored, uncoated, all natural and sustainably harvested. Sterilized for safety.

ACTIVITY CATEGORIES

PHYSICAL & MENTAL

Toys constructed with elements to engage a bird's balance, movement, chewing, manipulation, and problem-solving needs. These toys are good for mental stimulation and a full-body workout.

SOUND & MOVEMENT

Toys featuring elements including bird-safe bells, crunchy textures, chiming and noise-making materials, and free-moving, swinging, dangling components. These toys satisfy a bird's aural and visual needs.

PREEN & PACIFY

Toys include satisfying textures and materials like soft cotton rope, preenable fibers, spongy straws, and crumpled papers. These toys allow for quiet, pacifying play activities similar to preening.

FORAGE & ENGAGE

Toys include a range of fibers that may be plucked and shapes like coconut shell cups which can be filled with seeds and treats. These toys satisfy a bird's primary drive to forage, root, uncover, extract, and collect.

ANIMALS

OVER 3-FT LONG × NEARLY 2-FT WIDE!

The tight (3/8") wire spacing on our massive **Universal Small Animal Home** makes this an ideal cage for a mouse, gerbil, hamster, or rat.

This cage is **BIG** — more than 3-ft LONG and nearly 2-ft WIDE! Ramps and platforms add to the living space and give pets more room to play, explore, nap, and hide away.

The heavy-plastic, clip on/off base tub will hold bedding, toys, and accessories, and the rounded corner design helps keep cleaning fast and easy.

A large, all-around cage for a wide size range of small furry animal pets.
